

Buying a Domain & Setting Ontraport to Make Pages on the Domain

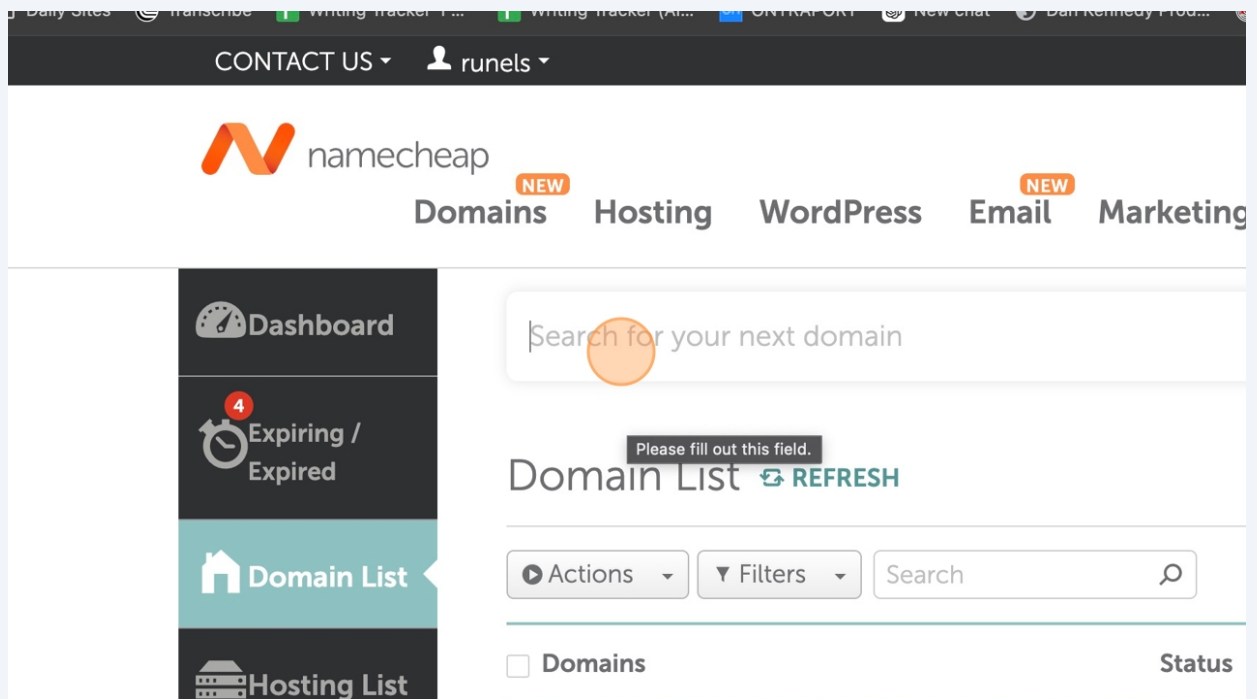

This shows you how to go to NameCheap.com, buy a domain, and then set up Ontraport to put a page on the domain.

1

After logging into NameCheap, go to "Domain List," then click "Search for your next domain."

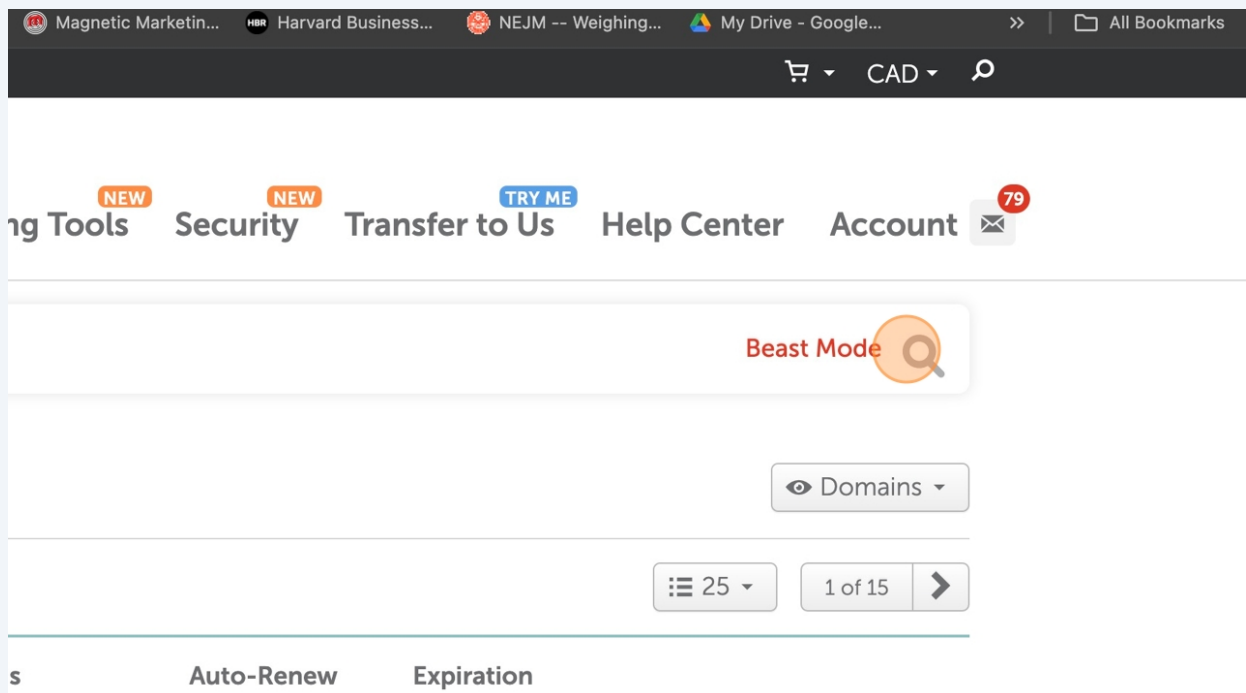

2 Click this search text field

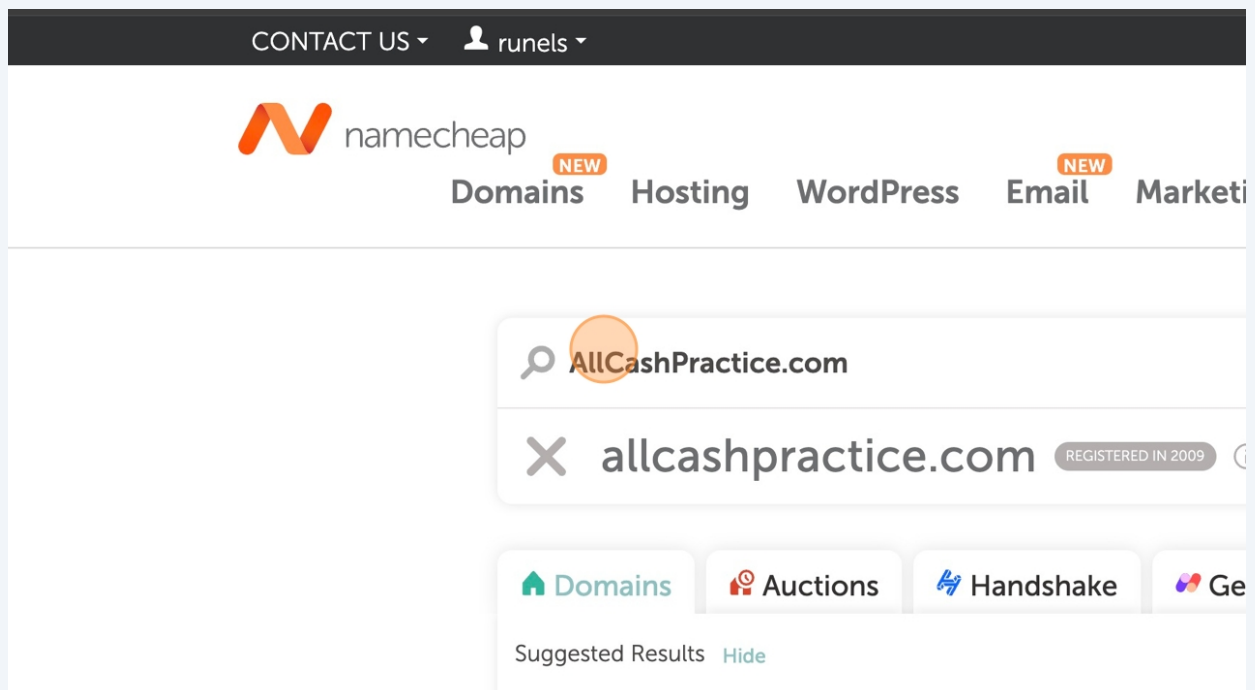

3 Type the name of the domain you would like to use/own, and click search.

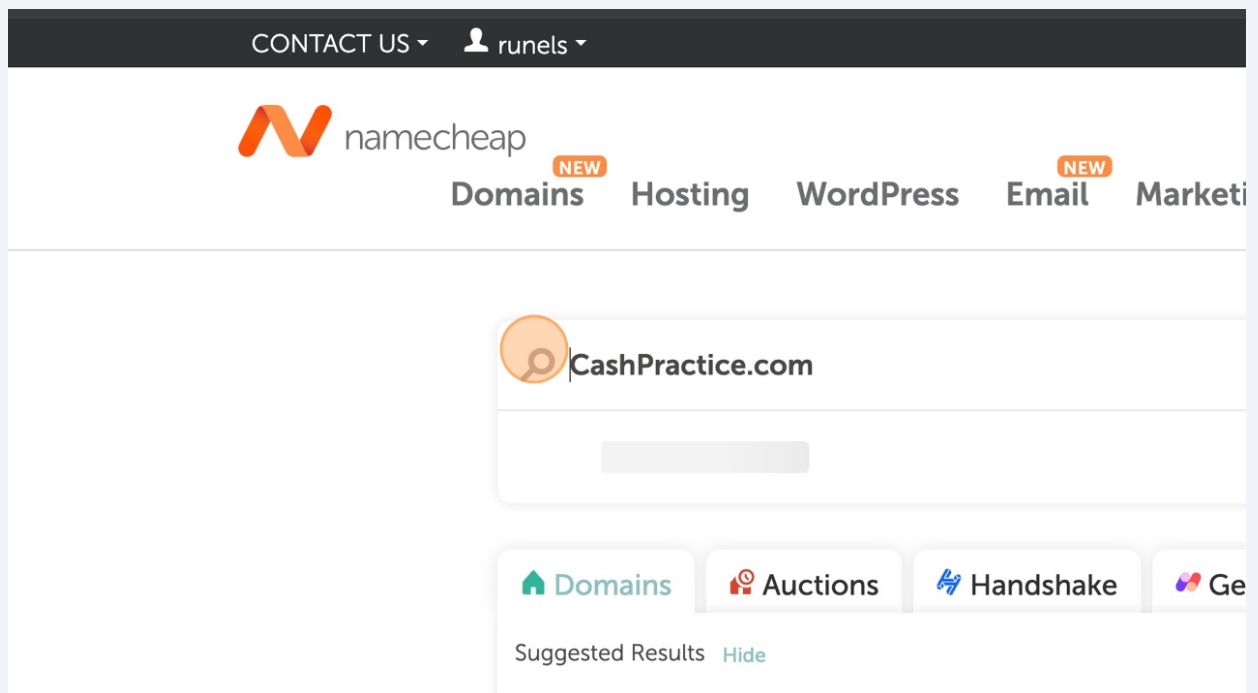

4 Click this search text field

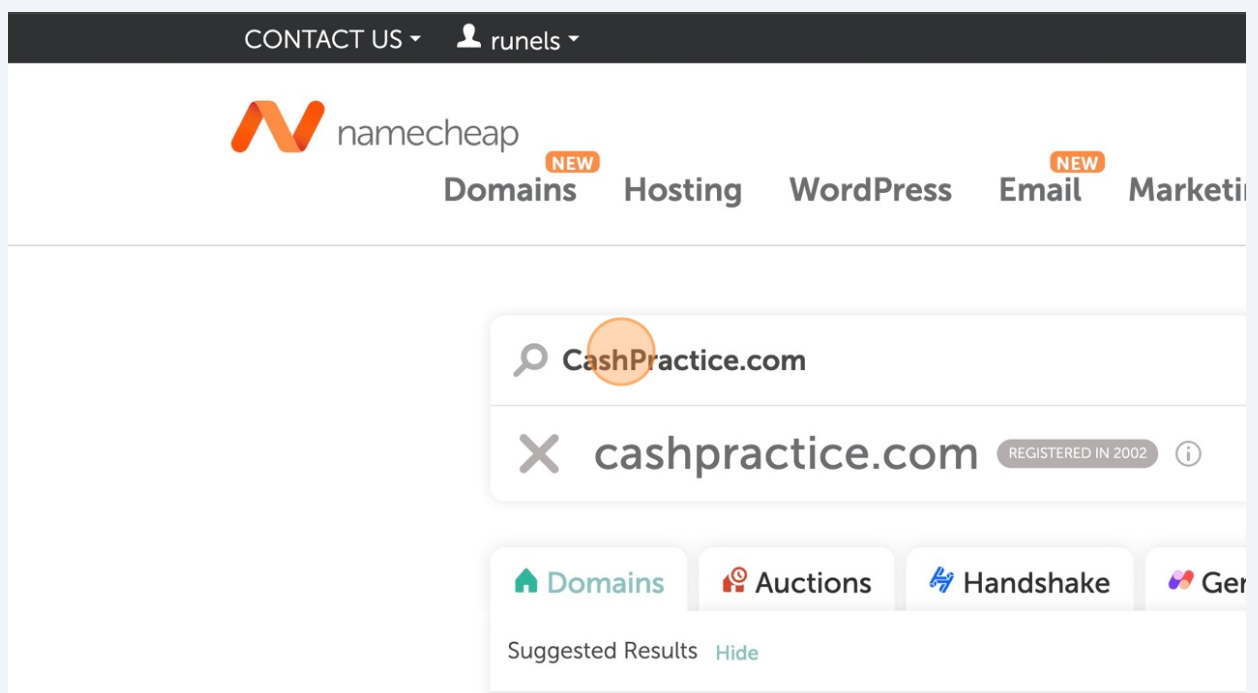

5 You can see me trying different domains until I found something that is reasonably priced and for which I can buy the .com. If you can't buy the .com, I recommend you try a different domain.

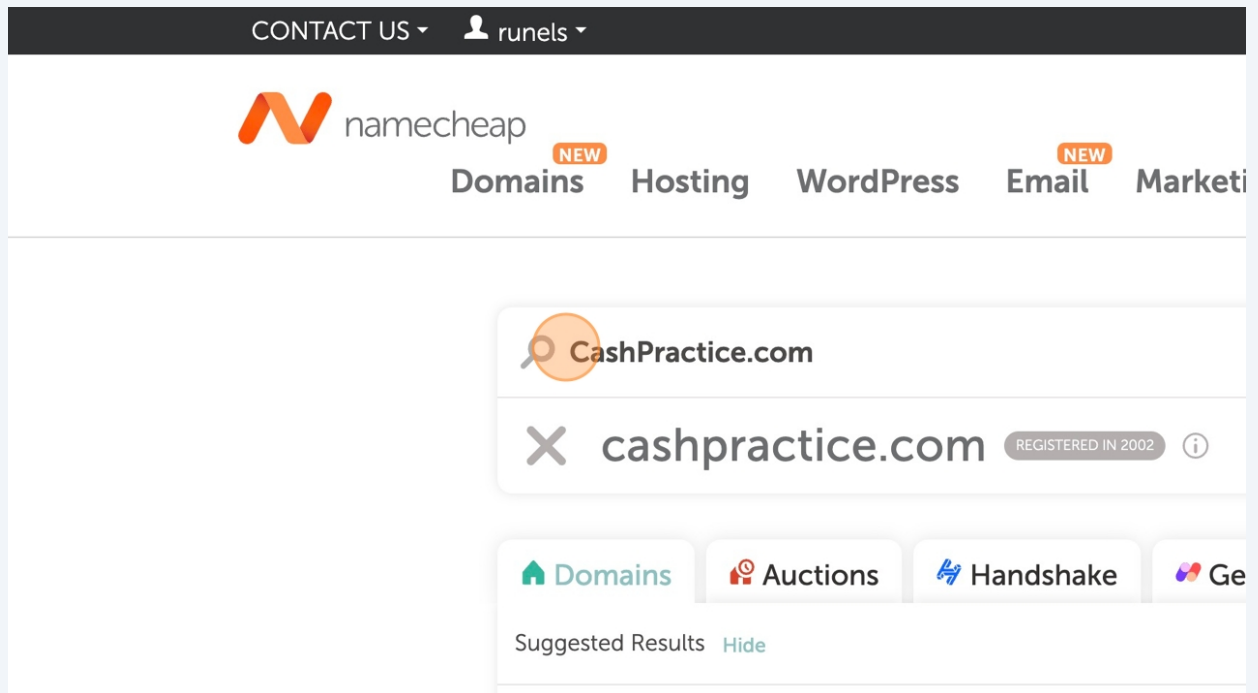

6 CashPractice.com was taken.

7 Click this text field

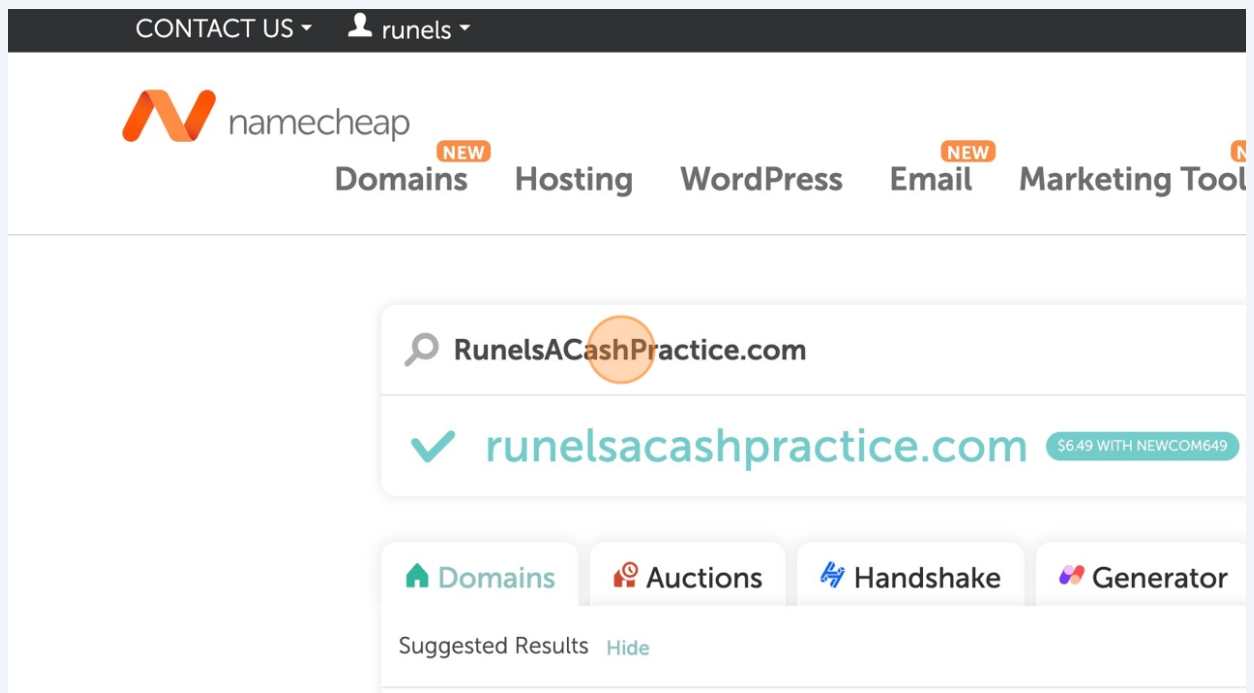

8 You see me sill looking.

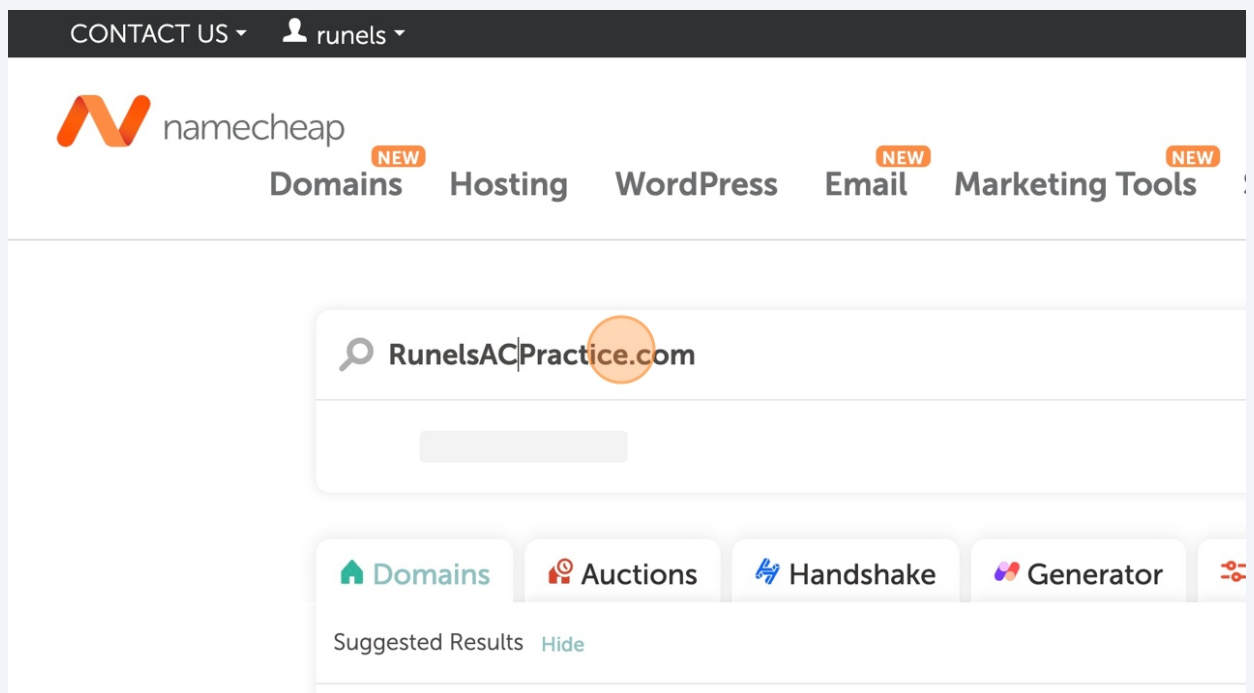

9 Type "RunelsA"

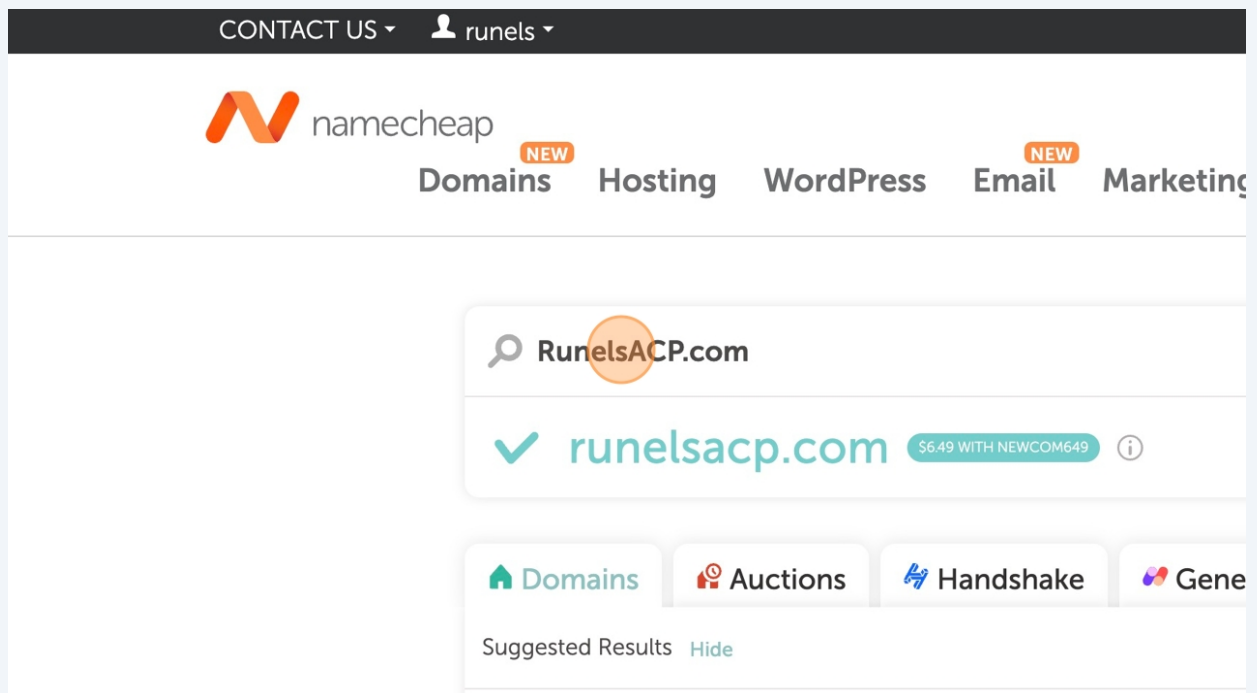

10 I try RunelsACashPractice, but I don't really like it.

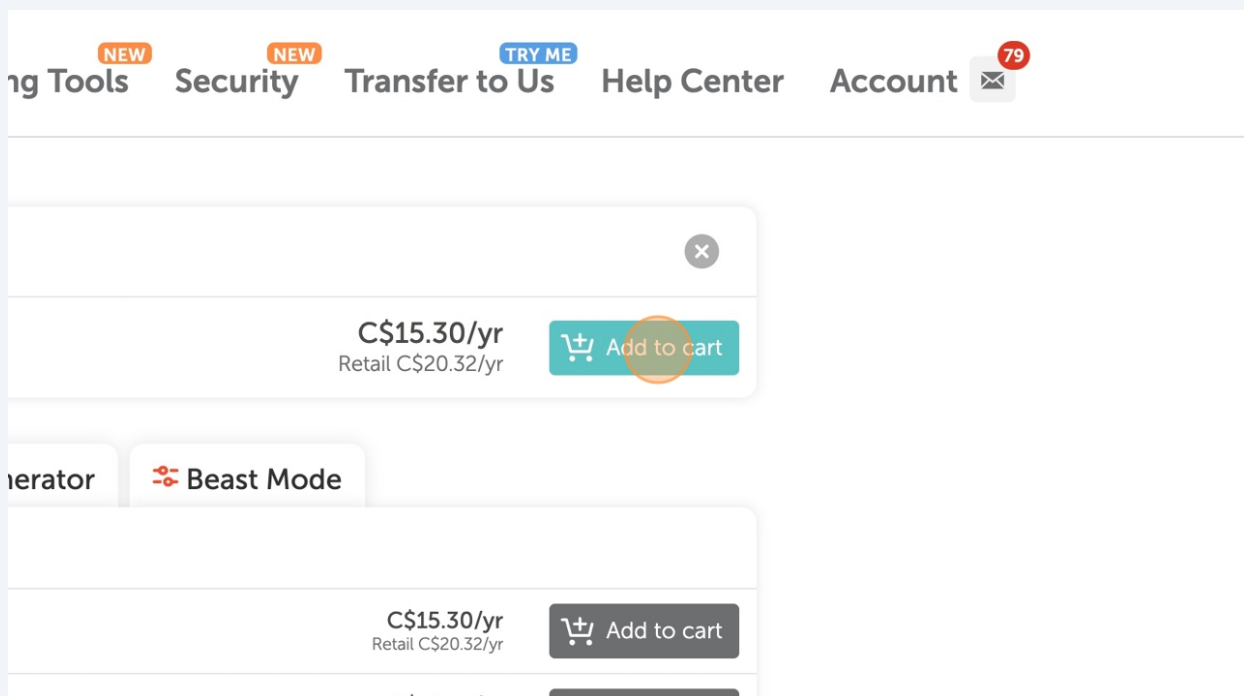

11 I try another one.

12 I try RunelsACP.com and it looks pretty good.

13 So, I buy it along with the .org, .net, and .info (just to tie them up to keep away from the poachers).

14 I buy the premium DNS to make it run faster.

The screenshot displays a grid of digital products available for purchase. Each product card includes an icon, the product name, a brief description, the price, and an 'Add to cart' button. The 'Premium DNS' product is highlighted with an orange circle. Below the grid is a navigation bar with tabs for 'Domains', 'Auctions', 'Handshake', 'Generator', and 'Beast Mode'. At the bottom left, there is a link to 'Suggested Results' and a 'Hide' button.

Product	Description	Price	Buttons
acp.info	PREMIUM	C\$1,204.68 Renews at C\$32.53/yr	Shopping cart icon
Business Email	Custom email@your-domain	Free trial	Shopping cart icon
SSL	Site security made simple	C\$8.13/yr	Shopping cart icon
Premium DNS	DNS Speed & Security	C\$6.62	Shopping cart icon (highlighted)
SEO Manager	Customized SEO tasks with step-by-step guides	Free trial	Shopping cart icon
Web Hosting	Website Builder included		Shopping cart icon
Social Media Manager	Use AI-generated content to grow your reach		Shopping cart icon
VPN	Get Safe & Fast Browsing!		Shopping cart icon
WordPress Hosting	Managed WordPress Hosting		Shopping cart icon

Suggested Results [Hide](#)

15 Click "Add to cart"

This screenshot shows a list of products with their prices and 'Add to cart' buttons. The 'Add to cart' button for the second product is highlighted with an orange circle. The list includes five items with their respective prices and retail values.

Product	Price	Retail Price	Buttons
	C\$15.30/yr	Retail C\$20.32/yr	Shopping cart icon
	C\$10.15/yr	Retail C\$17.61/yr	Shopping cart icon, Add to cart (highlighted)
	C\$17.61/yr	Retail C\$20.32/yr	Shopping cart icon, Add to cart
	C\$108.50/yr	Retail C\$122.07/yr	Shopping cart icon, Add to cart
	C\$40.67/yr	Retail C\$66.45/yr	Shopping cart icon, Add to cart

16 Click here

The screenshot displays a shopping cart with the following items:

- Free trial** (with an information icon)
- VPN**: Get Safe & Fast Browsing! (C\$1.34/mo)
- WordPress Hosting**: Managed WordPress Hosting (C\$9.33/mo)
- Web Hosting**: C\$6.08/mo

At the bottom, the cart summary shows:

- 5 items
- C\$55.27**
- [View Items](#)
- [Checkout](#)

A floating green circular icon with a white arrow is visible on the right side of the cart.

17 Click "Confirm Order"

The screenshot shows a checkout page with the following elements:

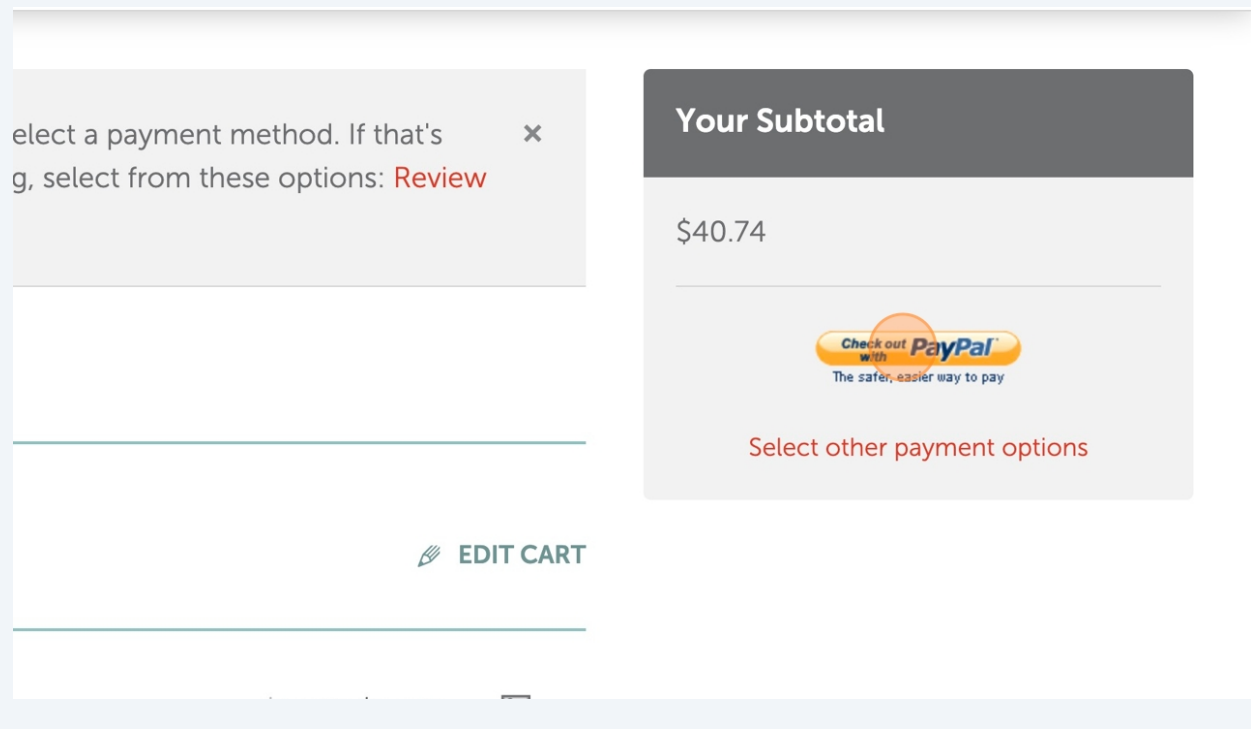

- WEEK** (header for the first section)
- C\$0.00** (price for the first item)
- FREE FOREVER!** (description for the first item)
- TO-RENEW** (toggle switch for the first item)
- €\$6.08** (price for the second item)
- C\$0.00** (price for the third item)
- TO-RENEW** (toggle switch for the third item)
- €\$6.08** (price for the fourth item)
- C\$0.00** (price for the fifth item)

A **Currency notice** states: "charges are applied in USD and may be subject to **exchange rate** changes and additional bank fees".

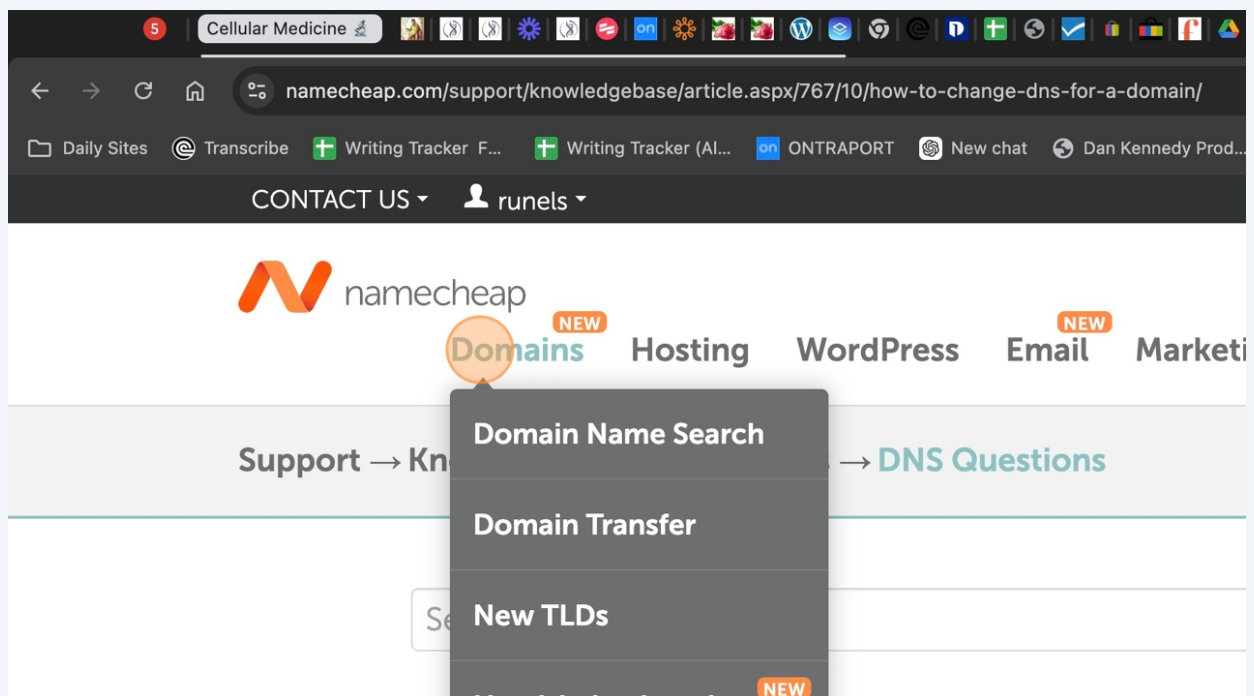

The **Confirm Order** button is highlighted with an orange circle.

The **Promo Code** section includes a text input field with the placeholder "promo code" and an **Apply** button.

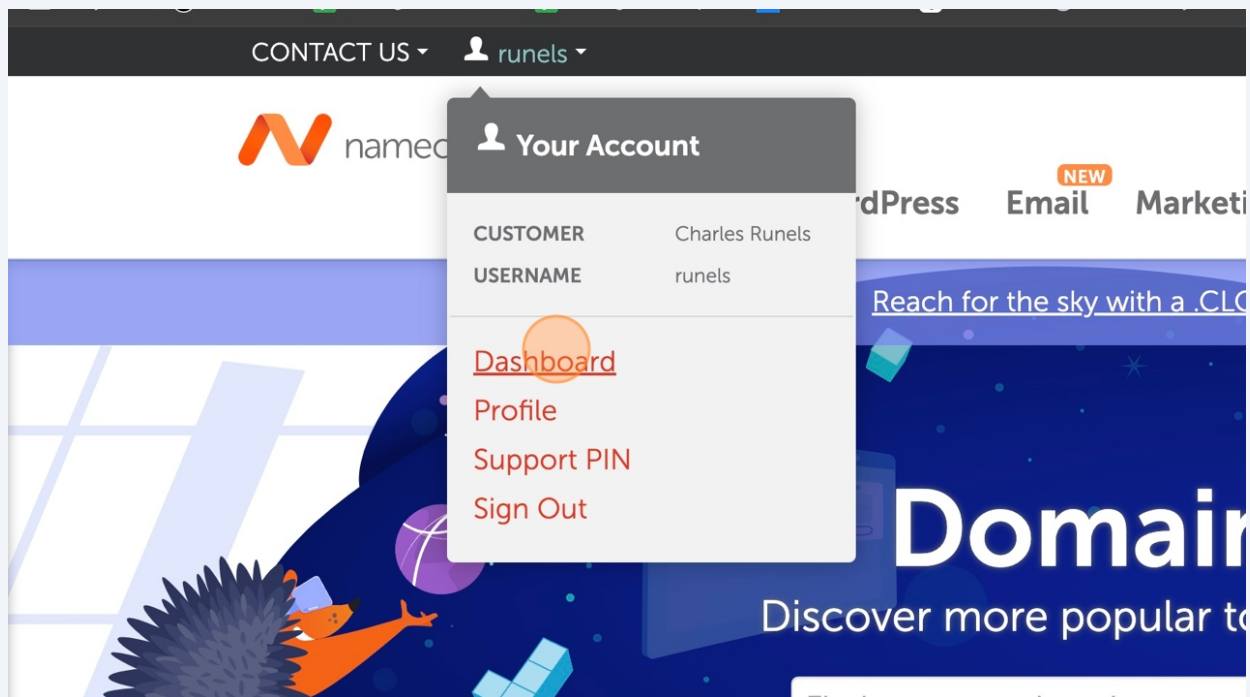

18 Click "Pay Now"

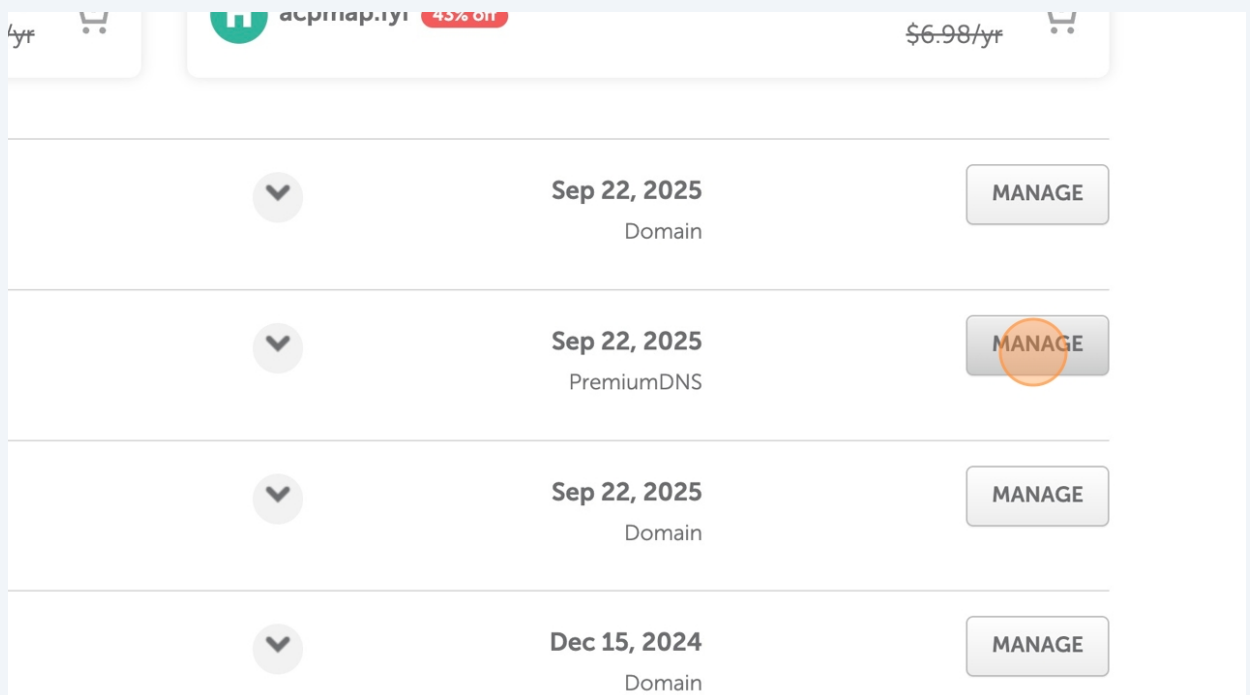

19 Click "Domains"

20 I go to my "Dashboard" to see that it is in my account.

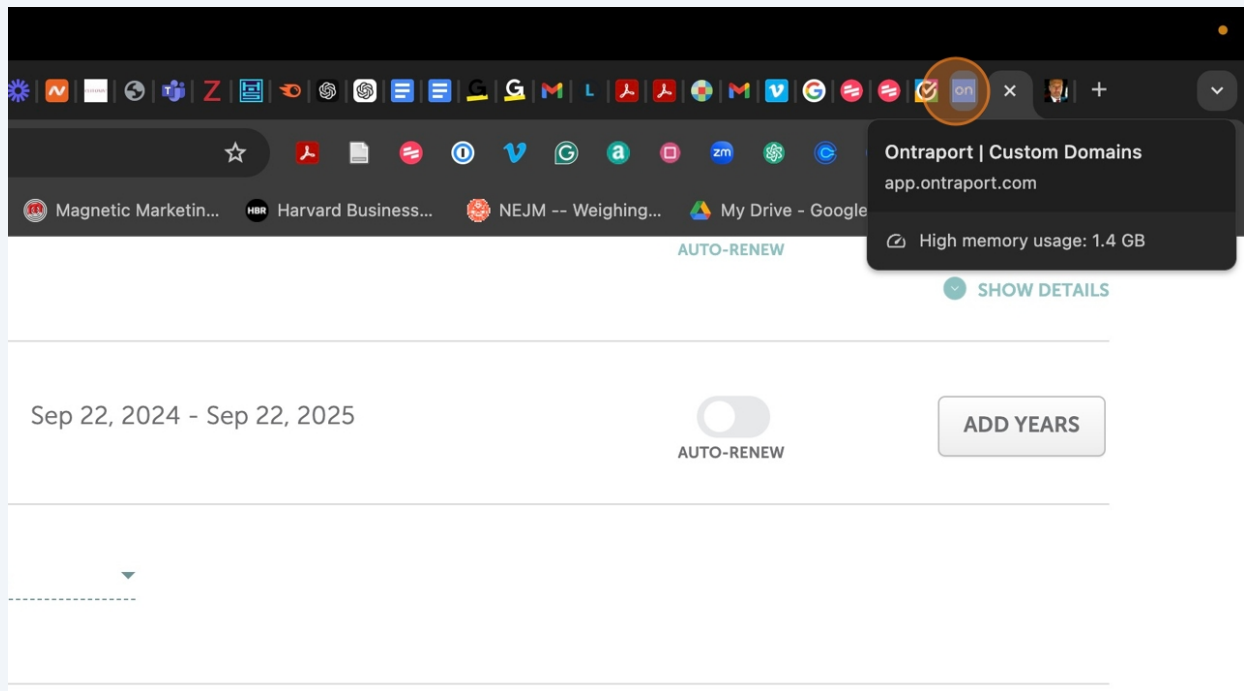

21 Normally, you'd need to go to the MANAGE link to set up a Wordpress site. But, if you are letting Ontraport host it, you can skip this step (I recommend you skip this step for the easiest way to do it all yourself).

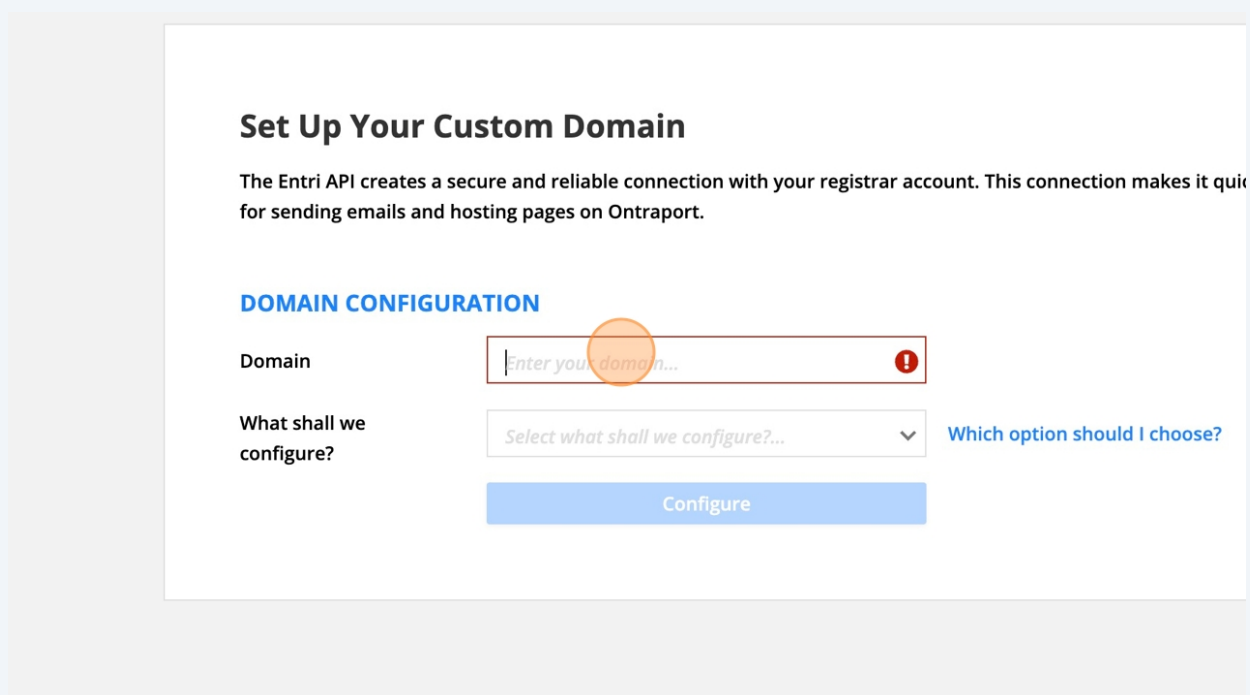

22

Always turn on "autorenew." I have lost a few very valuable websites because I did not see the need to renew email.

23

Then go back to Ontraport and to Administration-> Business Info -> Custom Domain. Then put in the domain into the box. If you already have a website that is built out and you just want to add pages, then add it like this something.yourwebsite.com that let's you set up a subdomain and add pages without erasing your whole website. If you do not already have a website built (because you just bought the domain on NameCheap), then put in yourwebsite.com in the box.

24

I Typed "[ACPMap.com](https://www.acpmap.com)" because that is what I just bought. You would type the domain you bought as described in the last step.

25

Then click the drop down menu to tell Ontraport what to do with the domain.

Set Up Your Custom Domain

Entrti API creates a secure and reliable connection with your registrar account. This connection makes it quick and easy to set up your domain, email, and hosting pages on Ontraport.

MAIN CONFIGURATION

Domain

[Change provider](#) [Show added DNS records](#) (v)

33 I have my [Namecheap.com](https://namecheap.com) account set up to require a confirmation by a code texted to my cell phone; you should do the same thing. Your website will become very valuable and without this you are more likely to get hacked.

we

 namecheap

Enter code

An SMS with verification code was sent to your phone:

Charles Runels - (+X)-XXXXXXX704

Enter code

Continue

34 Type "443694"

35 I type in my code that was texted to me.

Enter code

Charles Runels - (+X)-XXXXXXX704

443694

Continue

36

And then that's it! Now I can make web pages very easily. It's the set up that's confusing. Hopefully, this video helped. Once it's done, you will see, it's very easy. It's just knowing which button to click next. Then, unless you build another website, you never have to do this part again.
